

Webkinz Dupe Cheat

Contributed by Akira K.

Have you heard about the new Cheats to dupe items in Webkinz World? Get current and find out how in this in depth duping guide!

Theres some methods and secret cheat codes that are rumored to allow you to dupe items and maybe even Webkinz in Webkinz World. This means you would be able to make endless copies of any item you have.

There are several secret cheat codes to do this, but ill only describe a few of them here. Many of them will be kept secret for now so that the ability to do the Webkinz dupe cheat isnt over used and eliminated from the game altogether. The secret cheat codes and methods I give here probably wont last very long so use them while you can!

The first and probably oldest of the Webkinz secret cheat codes for duping is the dock dupes. There are a couple of ways to do this that I will describe here. Webkinz Secret Dupe Cheat Code#1: Click and drag an item from the dock, hold the button down and dont let go of it. Drag your cursor all the way up to the refresh button on your browser, and click it several times as fast as you can, then very quickly, as quick as you can drop the item into your room. If your timing was right you should now have the item both in your dock and in your Webkinz room.

Secret Webkinz Dock Dupe Cheat #2: Invite a friend to your room. Click and drag an item from the dock, hold the button down and dont let go of it. When your friend arrives close your browser quickly and wait 1 hour then log on again. If your timing was right you should now have the item both in your dock and in your Webkinz room.

Secret Webkinz Dock Dupe Cheat #3: Click and drag an item from the Webkinz dock, press and hold alt+f1 while holding the item for exactly 12 minutes. This only works occasionally.
